

EGALiTE at #EHA2023Congress in Frankfurt

EGALITE participated at the **EHA Collaboration Plaza** during this year's hybrid **EHA Congress**, which took place **8th- 11th June, 2023** in Frankfurt, Germany, with extended virtual sessions during 14th and 15th June.

EGALiTE was present with its own booth at the Collaboration Plaza among more than 80 exhibitors and a diverse range of partners, EU funded projects, patient organizations, network partners, and more, who all come together to discuss the latest advances in the field of hematology.

The congress was an opportunity – provided by our partner EHA - to showcase the EGALITE project to EU stakeholders to discover more on the Action's work on the accreditation of SoHO establishments, the harmonization of practices among Collection Centers, Blood, Tissue and Cell Establishments, encouraging sustainability and collaboration, along with the implementation of strategies to improve accessibility and sufficiency of SoHOs in the EU, by developing and establishing a quality programme, delivering significant benefits and utility for citizens, health systems and organisations.

For the occasion, tailor-made branding and promotional material was developed, including a 4-page digital/print flyer for a quick overview on our work and the collaboration of our partners, towards a common EU accreditation program which will help achieve mutual recognition among SoHO Entities and optimise resources, collaboration, EU sufficiency, and a rapid response to health threats and implement contingency plans and technical assistance to Member States.
